

**GLOBAL CLIMATE CHANGE ALLIANCE:  
PACIFIC SMALL ISLAND STATES PROJECT**

**REPORT ON LOGICAL FRAMEWORK APPROACH WORKSHOP PART II IN TUVALU**

**4-6 March 2015**

## Introduction

The Global Climate Change Alliance: Pacific Small Island States (GCCA: PSIS) project is funded by the European Union (EU) and implemented by the Secretariat of the Pacific Community (SPC) in collaboration with the Secretariat of the Pacific Regional Environment Programme (SPREP). The project budget is €11.4 million. The implementation period for the GCCA: PSIS project is from 2011 to 2015.

The overall objective of the EU funded GCCA: PSIS project is to support the governments of nine Pacific smaller island states, namely Cook Islands, Federated States of Micronesia (FSM), Nauru, Marshall Islands, Niue, Kiribati, Palau, Tonga and Tuvalu, in their efforts to tackle the adverse effects of climate change. The purpose of the project is to promote long term strategies and approaches to adaptation planning and pave the way for more effective and coordinated aid delivery on climate change at the national and regional level.

The project approach is to assist the nine countries design and implement practical on-the-ground climate change adaptation projects in conjunction with mainstreaming climate change into line ministries and national development plans; thereby helping countries move from an *ad hoc* project-by-project approach towards a programmatic approach underpinning an entire sector. This has the added advantage of helping countries better position themselves to access and benefit from new sources and modalities of climate change funding, e.g. national and sector budget support.

Between March 2013 and May 2014, training in proposal preparation using the logical framework approach was delivered to 9 Pacific small island countries, including all four states of the Federated States of Micronesia. The results of a longitudinal survey issued three months after participants attended the training indicated an interest in follow-up training on the LFA in addition to training on monitoring and evaluation. Several countries also made direct requests to SPC for additional capacity building training in project design.

SPC responded to the longitudinal survey feedback and country requests by announcing the delivery of follow-up training on the LFA and project monitoring in five Pacific small island states<sup>1</sup>.

### **GCCA: PSIS Capacity development in the Logical Framework Approach and Project Monitoring Part II ('LFA Workshop Part II') in Tuvalu.**

The first LFA Workshop Part II was held in Funafuti, Tuvalu between the 4<sup>th</sup> and 6<sup>th</sup> of March. The workshop was delivered by two facilitators from Pacific Research and Evaluation Associates (PREA). The four-day course was delivered over 3 days due to the late announcement of a public holiday during the planned training period. A summary agenda documenting the main topics covered during the training is presented in Annex 1.

The objective of the workshop was to:

- Apply the Logical Framework Approach to develop a robust logframe matrix.
- Develop an accurate timeline and budget for projects, based on identifying the tasks and costs to implement activities in the logframe matrix.
- Develop a monitoring plan and understand how to monitor projects as they are implemented.

PREA liaised with SPC and the GCCA: PSIS coordinator to identify the specific training needs of the Tuvalu attendees. All relevant training resources were provided to participants in hardcopy with an electronic copy provided on a USB stick.

The workshop was attended by 19 participants from both the Government and non-government sector. Several town planners from the outer islands were present at the training. (See Annex 2 for a list of workshop participants).

---

<sup>1</sup> Tuvalu, Marshall Islands, Palau, Tonga, Kiribati

The LFA training workshop was organised by SPC with support from in-country staff Mr Faoliu Teakau, SPC-GCCA: PSIS national coordinator for Tuvalu from the Dept. of Environment. Mr Pasuna Tuaga, Assistant Secretary for the Ministry of Foreign Affairs, Trades, Tourism, Environment and Labour, welcomed participants and officially opened the workshop. Dr Gillian Cambers, Program Manager SPC GCCA: PSIS also provided opening remarks and added additional context for the training workshop, and background to the SPC GCCA: PSIS project in Tuvalu.

After introductions, the two training facilitators from PREA began workshop proceedings.

### **Workshop Results**

A very successful and useful training. My first time ever to attend such kind of training, and I found it very interesting and relevant to what I am doing in the office.

Training delivery included a mix of informative presentations, large group activities to demonstrate new knowledge and skills followed by small group activities where participants were challenged to use the knowledge and skills for real-life project ideas they wanted to develop (see Annex 3 for photo of group work). The whole-of-class activity focussed on a semi-fictional case study to implement a renewable energy project in a small island state. There were six small project groups that worked through the LFA, representing the following project ideas:

1. Improving piggery practices in Nanumaga
2. Increasing pulaka production in Nanumaga
3. Improving transportation to outer islands
4. Increasing water security in Funafuti
5. Improving solid waste management in Funafuti
6. Increasing the number of students graduating from FSS

The in-country staff organised a speaker, Mr Kilifi O'Brien from the Ministry of Home Affairs to share his experience of using the LFA to design a project.

The workshop concluded on day three with Dr Gillian Cambers and Mr Pasuna Tuaga issuing certificates of participation to attendees.

### **Workshop Evaluation**

The detailed results of the workshop evaluation are presented as Annex 4. Seventeen participants who attended the workshop completed a post-workshop evaluation form.

I loved the log matrix, since I learned a lot to identify problem, solutions, and effects, which I think it is a necessary part. It is where I gather all information and I can know more on my core problem.

Most participants indicated a strong degree of confidence in being able to complete the problem tree and solution tree steps of the LFA upon their return to work. There was also moderate to strong confidence in developing a logframe matrix, developing a project monitoring plan, timeline and budget. Participants appreciated the usefulness of the LFA to design projects. The benefits of using a problem tree and solution tree was acknowledged by several participants.

The steps leading up to the logframe matrix that make the matrix more effective and proposal more feasible.

The most popular topics for further training and development were:

1. Project monitoring and evaluation (x 6)
2. Logframe matrix (x 4)
3. All of the LFA (x 2)
4. Timeline and budget (x2)

The popularity of project monitoring may be related to the rushed delivery of this module due to reduced workshop delivery period.

All but one participant indicated that they would recommend the course to their colleagues. Six respondents indicated the length of the training was about right, whereas eleven indicated it was too short. This result again reflects the reduced workshop delivery period.

The participants all indicated satisfaction with the delivery, and the resources provided.

The medium term outcomes resulting from the training will be assessed through issuing a longitudinal post-training survey (3–6 months after the training) combined with telephone interviews.

### **Conclusion**

The training was very successful in continuing to build the capacity of Government staff in Tuvalu. Participants who attended the initial LFA training benefited from the refresher and extended their knowledge with project monitoring and a more detailed look at project timeline and budget. Participants who were new to LFA also benefited and the feedback indicated they can see the value of the LFA and most have a degree of confidence to use the LFA in their work. The impact evaluation in several months' time will determine whether any of the projects worked on during the training will be developed into real proposals.

## Proposal preparation using the Logical Framework Approach - Part II

### Workshop Objective

To build participant capacity in applying the logical framework approach to designing projects, and to build capacity in project monitoring. More specifically at the end of this training programme, participants will be able to:

- apply the Logical Framework Approach to develop a robust logframe matrix;
- develop an accurate timeline and budget for projects, based on identifying the tasks and costs to implement activities in the logframe matrix; and
- develop a monitoring plan and understand how to monitor projects as they are implemented.

### Workshop Schedule

Day 1	Day 2
Official opening Introduction to the Logical Framework Approach Step 1. Situation Analysis Step 2. Stakeholder analysis Step 3. Problem analysis Step 4. Solution analysis	Step 5. Strategy analysis Step 6. Logframe matrix
Day 3	Day 4
Step 6. Logframe matrix Monitoring your project	Step 7. Timeline Step 8. Budget Workshop evaluation Certificate presentation * Note: Day 4 topics were covered on day 3.

**SPC**

**Photos of workshop activities**

**Global Climate Change Alliance: Pacific Small Island States**  
Building climate change

	INDICATORS	GOV	ASSUMPTIONS
Objective	Contribute food security in Nansanaga/Island	10% increase in pigs by 2013	Climate Change (Global 2013)
Purpose	Improved Pigery Management in Nansanaga Island by 2013	less than 5 pig per acre per month for pigery have offered control/management	Town Council
Output	Model Pigery established	1 model pigery develop by 2013	Pigery Dept
Activities	Farmer's trained and have wire pig pens built	12 farmer's trained by 2013 17 farmer's trained by 2013	Training Report
Output 2	21st - building of building material 22nd - transporting of building material 23rd - Distributing of building material		Material continue from land on farm land secured Farmer's while

## ANNEX 4

### POST TRAINING EVALUATION FORM - Tuvalu

Completed by 17 participants

The training was well structured	10	3	3	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	The training was poorly structured
----------------------------------	----	---	---	--------------------------	---	--------------------------	--------------------------	------------------------------------

The activities gave me the confidence that I can apply the knowledge in my work	11	4	1	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The activities did not give me confidence that I can apply the knowledge in my work
---	----	---	---	---	--------------------------	--------------------------	--------------------------	---

I found the learner guide useful	13	3	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I did not find the learner guide useful
----------------------------------	----	---	--------------------------	---	--------------------------	--------------------------	--------------------------	---

I learnt things that will be useful to my work	12	3	<input type="checkbox"/>	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	I did not learn things that will be useful to my work
--	----	---	--------------------------	--------------------------	---	--------------------------	--------------------------	---

The course was well presented	8	7	1	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	The course was poorly presented
-------------------------------	---	---	---	--------------------------	---	--------------------------	--------------------------	---------------------------------

The facilitators made the material enjoyable	10	5	1	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	The facilitators did not make the material enjoyable
--	----	---	---	--------------------------	---	--------------------------	--------------------------	--

For each of the following, please rate your level of confidence in being able to undertake the following steps of the logical framework approach when you get back to your job.

	<i>Very confident</i>				<i>Not at all confident</i>			
Problem analysis	10	4	3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Solution analysis	11	4	2	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Logframe matrix	7	6	3	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Project monitoring	6	6	4	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Timeline	8	4	5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Budget	7	3	3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

I am confident that I can design a good project	7	5	5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I am not confident that I can design a good project
---	---	---	---	--------------------------	--------------------------	--------------------------	--------------------------	---

I would recommend this course to my colleagues	14	2	<input type="checkbox"/>	1	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	I would not recommend this course to my colleagues
--	----	---	--------------------------	---	--------------------------	--------------------------	--------------------------	--

Four days for the course was:	About right	6
	Too short	11
	Too long	<input type="checkbox"/>

What was the most useful thing you learnt on this course?

<p>All topics covered in this training</p> <p>An overview of how to write a proposal</p> <p>Analysing- micro, account for everything</p> <p>Designing a proposal, monitoring, evaluation</p> <p>Every steps of the LFA</p> <p>How to design a project from begin to end</p> <p>How to develop a LFA and its importance</p>
--

How to identify causes from effects. Doing the analyses to different situation when trying to formulate a project proposal.

I loved the log matrix, since I learned a lot to identify problem, solutions, and effects, which I think it is a necessary part. It is where I gather all information and I can know more on my core problem

Logframe matrix, prepare questionnaires and timeline

Preparing logframe matrix, monitoring and organising of tasks

problem tree analysis

Project monitoring was excellent

The steps leading up to the logframe matrix that make the matrix more effective and proposal more feasible

The useful and reliability the logframe matrix is

The whole approach is very useful to me

The course would have been more effective if:

Giving more days/time for participant to work on

Have enough days (approx. 10 days) and time for practise

In Tuvaluan language, need an interpreter

Invite more participants

More days are added to the training

More time and more activities

More time for more hands on activities

Presentations were in point form, have more examples

The more time we have the clearer the message we will receive

There is no public holiday on Monday

There will be more days and more training

We add 1 or 2 more days to the training course

We had more icebreakers

We have a little more time

Which topic(s), if any, do you want follow-up training on?

All LFA and M&E topics

I suggested that all the logical framework training approach should be followed-up. We should like to attend LFA programs in the future, worth listening, I learned a lot

I want follow up training on how to prepare logframe matrix - budget

Logframe matrix

Logframe matrix and monitoring and evaluation

Logframe matrix/monitoring

M&E

Monitoring and evaluation

Monitoring and problem tree

Problem and solution analysis

Project monitoring, create activity schedule, create budget

timeline

Timeline and budget

Do you have any further comments or feedback about any aspects of the training?

A very successful and useful training. My first time ever to attend such kind of training, and I found it very interesting and relevant to what I am doing in the office.

Have more practical works and group discussions. Thank you very much.

I think this is a very important training and good effect and benefit to my kaupule

It's a very good and useful training for me and my job

None, the training was good but we need more days. For the participant to work on project/learning project implementation

Nothing, the training is very useful

Sometimes feel I can't store every vital messages, since my brain is too tired, so if you can measure your time wisely, or extend, days for the workshop, since they are so important to us, especially planners from the outer islands.

The training is very useful to me and also it will be a good lesson to train my colleagues

Well delivered, unless more days are added to the training.

Would you be able to assist us if we need help with proposals in the future?
