

Community Resilience in Vanuatu

Lessons from Cyclone Pam

OUR PROGRAM

- A consortium approach

Six agencies working together across the islands

- A strong civil society network

Helping to build the Vanuatu Climate Action Network
and Pacific Islands Climate Action Network

- Working with the Vanuatu Government

Through through the National Advisory Board on Climate Change and Disaster Risk Reduction

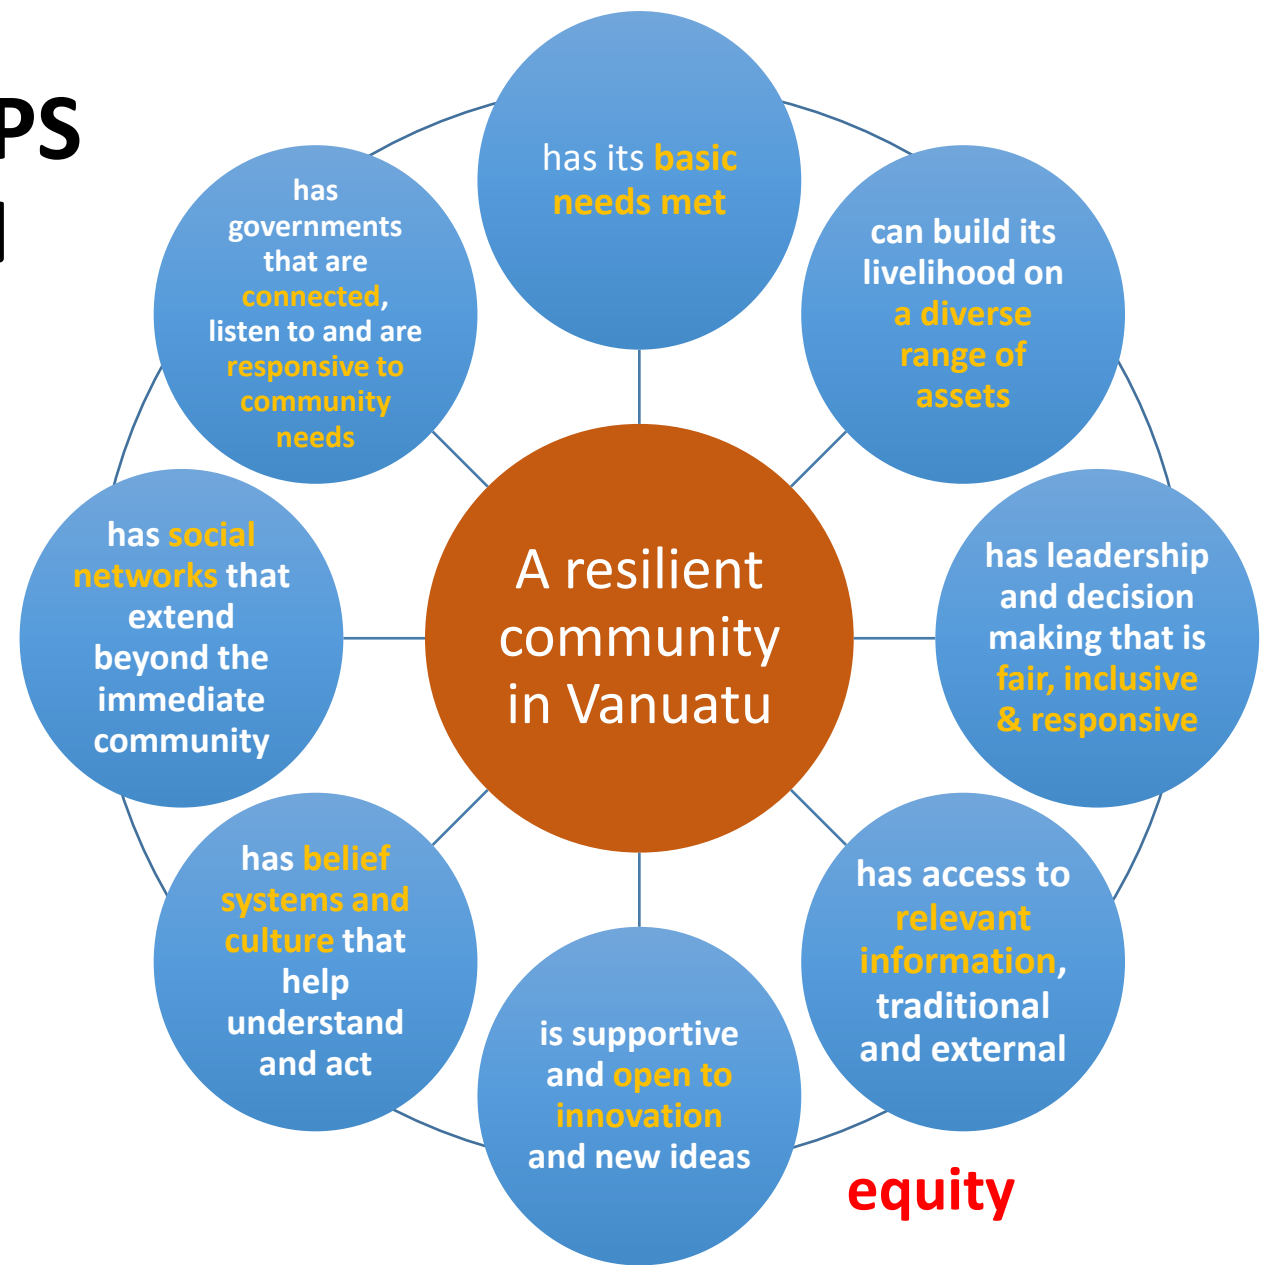

- Empowering communities

Participatory assessments, Community Disaster Committees and

Supporting women and youth-led adaptation decision making and planning

MEANINGFUL PARTNERSHIPS AROUND A SHARED VISION

LESSONS FROM PAM

Traditional knowledge + inclusive community preparedness + coordination saves lives

People in Vanuatu have a vast store of indigenous knowledge and wisdom to help them deal with cyclones. Programs must continue to recognize and build on Vanuatu's strengths and resilience.

Investment in coordination and collaboration has increased the speed and effectiveness of the response and recovery.

These findings and more are discussed in our new report:

Yumi stap redi long klaemet jenis

Lessons from the Vanuatu NGO climate change adaptation program
